tion in order to save time and thereby increase their efficiency in the discharge of their duties.

Try as one may we can never be 100% perfect in keeping track of a constantly changing population and there is also the human element of error in copying and assembling this data. With over 1800 addresses, post office and telephone exchanges recorded in these pages the end-less checking and rechecking necessary and the last minute changes due to human changeableness, the element of error is inevitable. If we have left any one out or have given the wrong information concerning any one — we crave your forgiveness and corrections.

This directory has been over three years in preparation and covers a territory over twice the size of the town and City of Ithaca and has been a one man job. I wonder, myself, how I have had the nerve to attempt it as a man of over 70, but with this issue I believe we have made history in a section of our New York State that already abounds in the "Foot-prints" of History and we thank God that He has enabled us to do it.

There have been changes in the names of some of the roads agreed to by the majority of the people living thereon, and we ask you to carefully compare the street directory of each Village and indicated "Section" with the maps provided so as to have them thoroughly in your mind.

Take your car and ride slowly over these roads and note the signs indicating Historic spots. Over the Gulf Hill Road, on through the Peruville-S. Lansing Road, you are following the oldest road ("Old State Road" date 1794) in this district. And Route 13 from Gulf Hill Road to Ithaca "The Bridle Road" 1797 — both opened by Joseph Chaplin a pioneer road builder.

On the back of the School district map you will find an explanation of the sequence of roads outside the village and location of the roads which names have been changed. On the back of the Village maps, village information and calendars.

We hope that the town and county boards of the various towns and counties involved will place

In this Dryden School District Directory we have attempted to do at least 2 things. First give a definite address for every school pupil, Second, by so doing to make possible for the School Nurse, Attendance Director and Census Taker to have this definite information

street signs at all intersections — as the Villages of Dryden and Freeville have already provided for their streets. When this is done with a definite directory address for every section of this School District we believe it will encourage the buying of lots and the erection of homes over this entire district and encourage even the further locating of industry therein.

I have done the hard "spade" work in getting this project started — it is your "baby" from now on to keep it up to date and reissued at least every two years. That means all changes in your neighborhood are to be reported to Robert E. Gibby VI 4-5202 or his successor and the new changes will be printed in the Rural News every three months.

CODE

In order to save space we have had to abbreviate some words in our alphabetical name directory. The code for the Street Directory will precede that part of the directory.

On each line we proceed in this order:

Name. Initials. Number. Street. Postal address as (P.O. or RD.) and Telephone Exchange. Example: Doe, John G 10 W (West) Main St (Street) (Dry) (Dryden Post Office) VI (Viking) Exchange.

Name without () indicates PO box, rural address.

We have 4 Post Offices in this district and 6 others that serve it.

Measure the time they save . . . the human energy they conserve . . . the new liesure they create . . . the added enjoyment they give in just plain living. These are things you can't evaluate in dollars and cents alone because they all add up to something more — something we call MODERN LIVING!
If you have any problems in connection with your service, please feel free to call on us at any time.

SCHOOL DISTRICT MAP and Other Information

By the use of this map of the Dryden School District, we now have a complete picture of your school neighborhood. We are one big-school district and you should be interested in our P. T. A. With 9 R.D.'s and almost as many postoffices where our pupils and parents get their mail, and as many phone exchanges where they may be called, it is easy to see there could be much confusion. Thus, we hope this directory will assist to clarify confusion. In the alphabetical section we give the P.O. or R.D. address of every residence and phone exchange.

Our dream was to give every school pupil a street and number and while we may have missed one here or there we hope it is complete. There are several homes that take welfare children, so the names of the foster parents may not coincide with that of the pupil . . . so each child in registering should give his street and house number and occupant of house.

Some of the roads have been renamed so we ask that you study the maps and the roads as given in each section of the Street Directory.

The white portion outside the shaded villages, which are included, is the Dryden School District

however, since school district maps were drawn a portion East of Gee Hill Road, has been given to the Virgil School District.

SCHOOL CUT ON FRONT COVER

As a School District we are proud of the new addition to our Dryden Central School, and the rebuilding of the old part recently destroyed by fire. In the Front page cut that part of the new construction to the left side was so built that additional class rooms may be added above when required. The addition to the rear not visible in the picture, houses offices, cafeteria and 13 class rooms—the last word in modern school construction. This school will make children coming here from larger city schools to feel at home at once in this modern school atmosphere.

Our School Board is to be congratulated on its accomplishment. Your appreciation can be shown by joining the PTA.
